

—QUALITY AND SOLUTIONS—

ZA Control Services, LLC was founded in 1991 in Houston, TX with a main focus on industrial automation and control systems integration.

Most automation projects include an array of design, fabrication, integration, installation, commissioning and followup maintenance of control systems using the latest technologies.

We have facilitated hundreds of clients world-wide when faced with downtime in the event of system and hardware complications. We look forward to earning your business.

INTERNATIONAL PARTS SUPPLIER

ZA Controls sources any electrical or mechanical component parts to meet your time sensitive needs. We source any brand or country of origin for parts.

We support our clients manufacturing with replacement parts on their machinery or as a means to update and increase the productivity of their equipment.

Obsolete and rare to find parts is our specialty. Experienced in expedited shipping via ports and customs worldwide.

CUSTOM CONTROL PANELS

Superior contract manufacturing and assembly solutions ranging from initial design through fabrication, programming, testing and implementation.

- Assembly, layout and wiring of control panels of any size and complexity
- Cable assemblies from simple to sophisticated
- Solar panels, fuse boxes, combiner boxes, monitoring data acquisition and communication enclosures
- In-house engineers assist in the development of designs per customer specifications

ENGINEERING

For many of our customers an out of the box solution is not an option; they require a custom engineered solution that will meet and exceed the demands of their industry.

- ☐ Electrical CAD Services
- ☐ Upgrade & review existing equipment
- ☐ Assembly & maintenance documentation
- ☐ Design review, enclosure modifications, cable design and red line drawings

FIELD INSTALLATION & CONSTRUCTION

ZA Controls employs an expert team of field service personnel to provide field start up and electrical troubleshooting services in support of our products or for the updating of existing systems throughout the Americas.

- ☐ Install cable tray, junction boxes, breaker panels, SDI cables and end devices
- ☐ Terminate plugs and receptacles, motors lighting, generators, and air compressors
- ☐ Terminate motors and auxillary equipment

COMPLETE TESTING & SIMULATION

ZA Controls has testing equipment made for a variety of industries. With our varied experience we will be able to provide a solution to your needs.

We have an extensive QA checklist and every control panel is hot tested before delivery.

- ☐ I/O simulation
- ☐ Device simulation
- ☐ Wire continuity testing point to point and power up

INDUSTRIES SERVED

Agricultural
Alternative Fuel
Chemical
Food & Beverage Packaging
Government
Manufacturing
Marine
Metals/Mining
Oil & Gas
